INSTALL METHOD

INSTALL AS FOLLOWING:

1. Unpack the Co2 Gun.
2. Connect the hose with machine through fast connector, other head of hose (pipe) is connected with co2 gas tank.
3. Install 3 pcs AAA batteries into flashlight and connect the plug of machine into it.
4. Depress the trigger on the Co2 Gun whenever you want to release co2. The Co2 Gun will recoil slightly each time the trigger is pulled
5. After use, close the valve on the co2 tank, and bleed any remaining gas in the hose through the Co2 Gun and then you can safely detach the hose from the CO2 tank.
